A first impression

This underground parking space offers an excellent option for car owners seeking secure and weatherproof parking. Built in 1969, the garage is in good condition. Access is via a large, electric roller door. The parking space itself measures approximately 5 meters in length and 2.5 meters in width, providing ample room for most common car models. The generous width makes parking easy, and getting in and out of the vehicle is also comfortable. Another advantage of this parking space is the excellent lighting within the garage, which ensures safety, especially during the dark winter months or when driving at night. The underground garage is part of a residential complex centrally located in a vibrant urban area. Thanks to the well-developed infrastructure, it is easily accessible both on foot and by car. Public transportation is in the immediate vicinity, offering added convenience for commuters. Furthermore, the nearby shopping facilities, restaurants, and leisure activities make this parking space particularly attractive. This parking space offers a practical and convenient parking option for residents and professionals seeking a permanent parking space in a central location. Its strategic location and excellent facilities also make it suitable for those wishing to rent a parking space in addition to their apartment or office. Interested parties are welcome to view the parking space by appointment to see its advantages for themselves. Contact us directly for more information or to schedule a viewing.
