A first impression

This spacious bungalow-style villa, with ceiling heights of up to 5 meters, sits on a generous 3,159 m² plot and offers approximately 330 m² of living space. The rooms are finished to a high standard throughout, providing a high level of comfort. Upon entering the house, you are greeted by a bright and spacious entrance hall with a cloakroom and access to the double garage. Numerous windows, some floor-to-ceiling, ensure plenty of natural light and an inviting atmosphere. The spacious living and dining room features a water-heated tiled stove and large panoramic windows that open onto the south-facing terrace and garden. The dining area seamlessly transitions from the open-plan living area to the kitchen, which can be closed off. The sitting room with its indoor and outdoor fireplaces is also ideal as a guest room. The kitchen, with its high-quality slate flooring, boasts exclusive furnishings and brand-name appliances. The master bedroom includes a separate dressing room. The adjoining hallway is designed as a walk-in closet and leads to two further bedrooms/children's rooms, each with its own conservatory. The bathroom, flooded with natural light, boasts comfortable fittings. A separate WC is available for guests. A particularly convenient feature is that all rooms on the ground floor have their own access to a terrace or garden. The almost completely wraparound natural stone terrace is partially covered and offers a variety of uses in almost any weather. The ground floor features high-quality solid wood plank and parquet flooring. The doors are made of solid wood and feature an elegant arched design. The mostly newly glazed wooden windows are fitted with custom-made insect screens. The basement offers additional comfort with a large spa area, including a swimming pool with a counter-current system, a shower room, a sauna for 6-8 people, relaxation areas, and windows providing natural light. Four further basement rooms offer space for fitness/yoga, laundry, hobbies, and a workshop. The fitness/yoga room has its own shower and WC. Heating is provided by district heating (wood chips). A 10 kW photovoltaic system with an equally sized Tesla battery, along with a solar thermal system and a 750-liter storage tank, ensures an environmentally friendly energy supply. The outdoor area includes a tiled swimming pool with a roll-up cover, a pavilion with thermal insulation glazing and a copper roof, and two garden sheds. A double garage with electric doors and two to three additional parking spaces are also available. An alarm system for the house and garden provides added security. This villa offers extensive usage possibilities and a high level of living comfort. As it was originally built as a business owner's villa in a mixed-use area, commercial use can also be considered. If needed, up to approximately 700 m² of commercial space can be leased in the adjacent industrial building. Despite its proximity to the businesses, the location is very quiet. The south-facing garden, in particular, offers unparalleled privacy and an unobstructed view of meadows and fields. Since businesses close by 6 pm at the

latest and no work is typically done on weekends, the villa offered here is virtually secluded during these times. Further information can be found in our detailed brochure.
